

NX Witness is one of the best camera viewer platforms available.
Nx is easy to install and use anywhere and anytime.

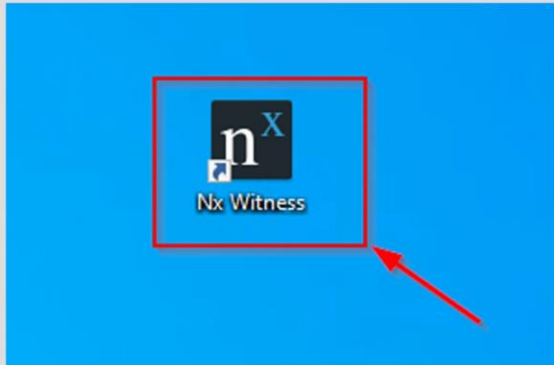

In this NX Witness guide, we are going to run through how to search and export footage on a desktop application.

If you require any assistance at any point, please call Tarnix Security.

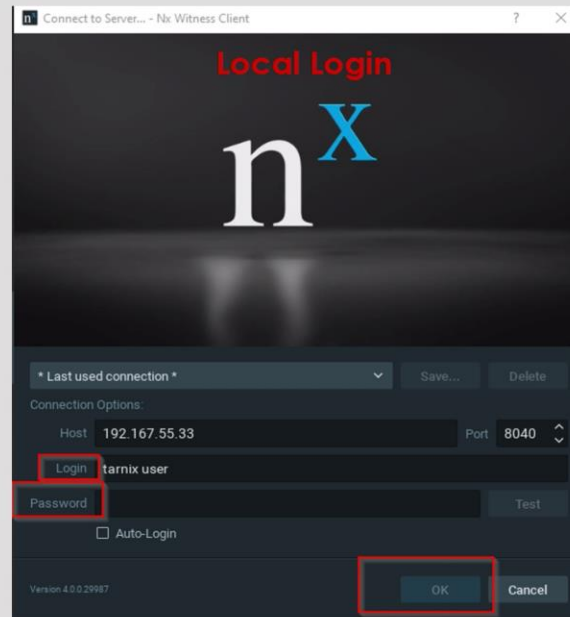

Please contact Tarnix Security on 07-573-7757 if required

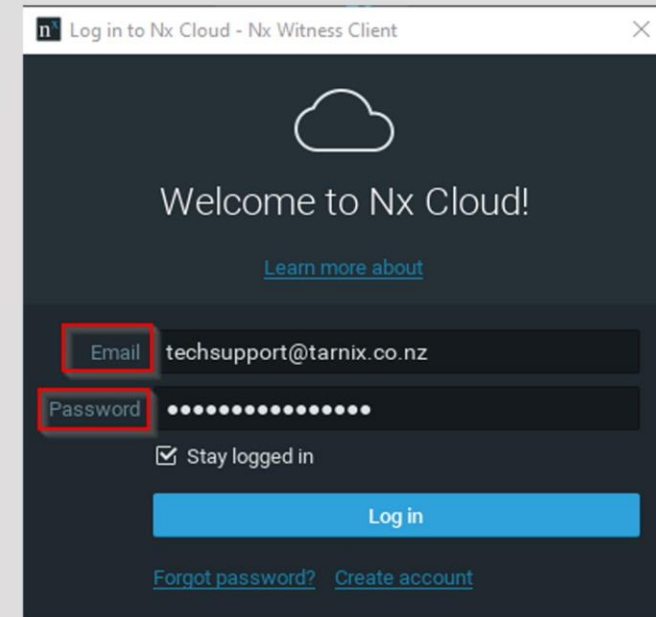

Open the NX Desktop application

Login into NX with a Local login

Or login with a Cloud Account

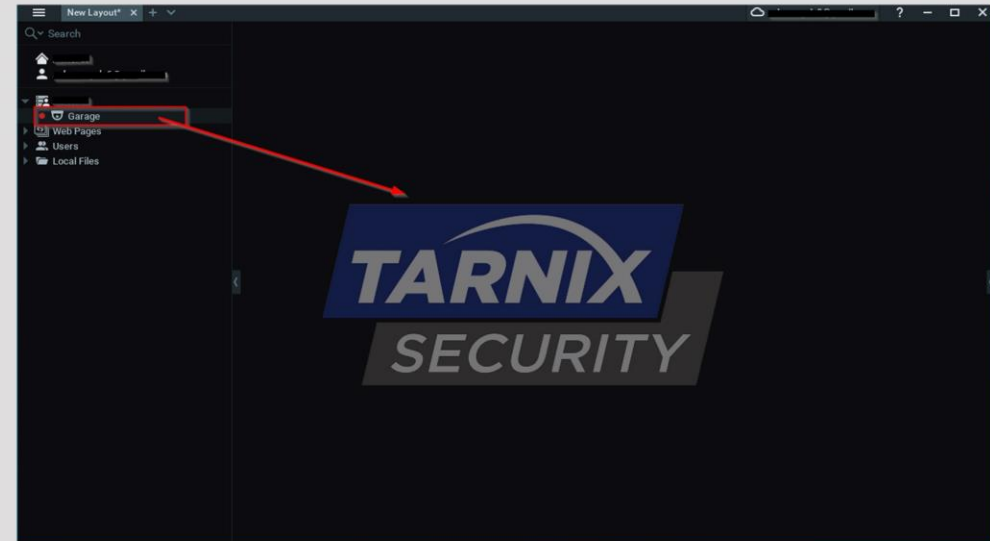

Please contact Tarnix Security on 07-573-7757 if required

Click the little arrow to open the camera menu

Double click selected camera or click and drag the camera to the middle of the screen

Please contact Tarnix Security on 07-573-7757 if required

NX Time & Date Selection

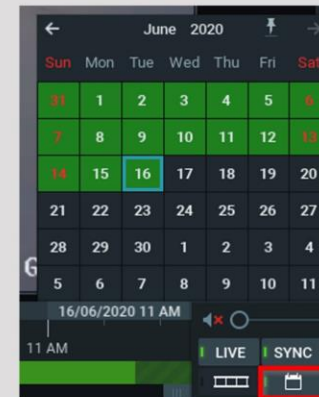

Click the little arrow to open the playback menu

Using your mouse scroll wheel, zoom in to a specific time you would like to review

Or use the calendar option on the bottom right

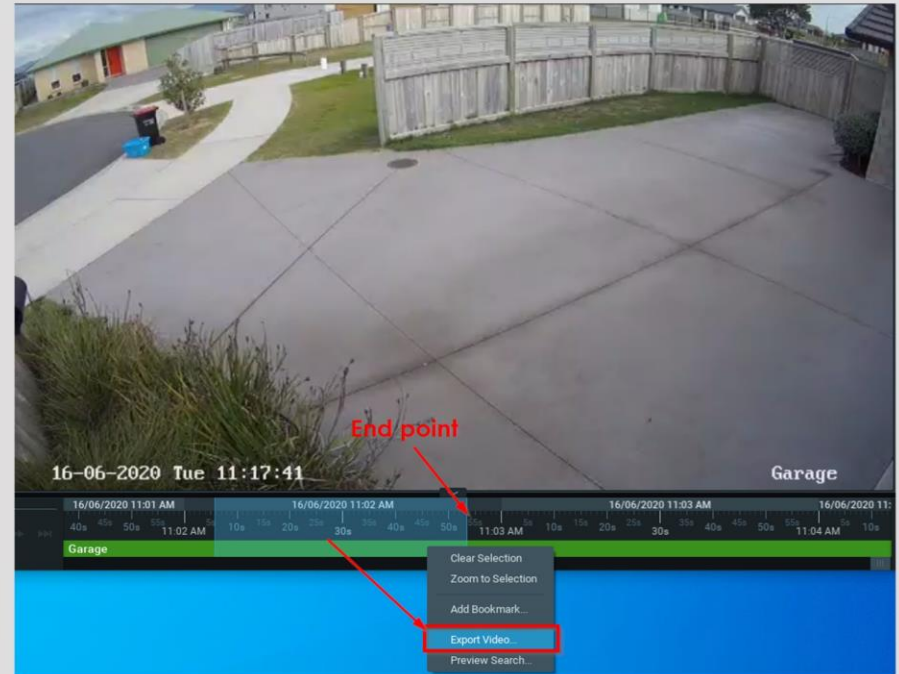

Please contact Tarnix Security on 07-573-7757 if required

NX Footage Selection

Right Click on your start point and select "Mark Selection Start"

Repeat start point instructions to select your endpoint.
Your time selected will now be highlighted blue, right-click in the highlighted area and select "Export Video"

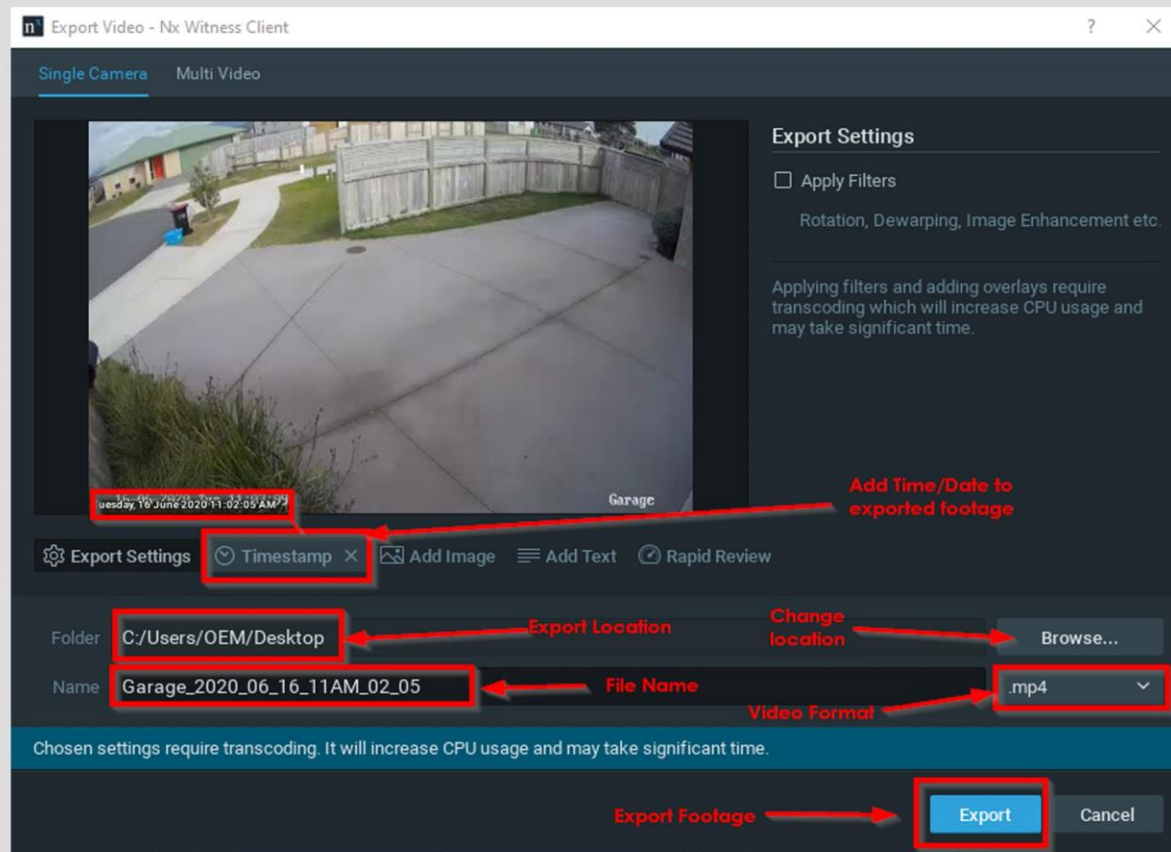

Please contact Tarnix Security on 07-573-7757 if required

NX Footage Export

Final Step
Export the selected footage
** Features are optional **
Proceed to click export if features are not necessary

Please contact Tarnix Security on 07-573-7757 if required
